

Capilano University & Sustainability

Capilano University is accountable to our community and we aim to demonstrate environmental stewardship as an example for others to follow. Our mission statement emphasizes our commitment to the 'establishment of policies and procedures that reflect the best standards of environmental stewardship'. Our daily business practices reinforce our responsibility to manage our resources for the benefit of present and future generations. Capilano University is striving to become a model environmentally responsible institution and actively promotes conservation-minded & sustainable behaviours among our students, staff, faculty, administration and the broader community that is Capilano University.

To that end:

GET UR FLEECE ON!

The energy management team is happy to provide a fleece blanket to you in hopes you consider the amount of energy that can be saved by dressing warmly during winter months and/or using a small blanket over your lap/shoulders/feet while at your desk. Please keep & use the CU Fleece blanket at your work space on campus.

BC Hydro and FortisBC have partnered with Capilano University to provide fleece blankets for any employee at Capilano University. The blankets are made from 100% recycled material. If others in your area would like a fleece blanket, please contact us.

Have a great day,

CU Energy Management Team
