

Blended Diploma/Degree Profile

Unlike most other degrees with related diplomas, ours is blended not stacked. The admission requirements for the diploma program include two years of post-secondary academic training or equivalent learning experience. Most of our diploma students already have degrees. Diploma students will take the core legal courses (shaded courses below) alongside the degree students, rather than taking two lower level years towards a diploma followed by two upper level years to complete the degree. However, because diploma students will be able to compress their studies (core legal courses only) into two years, they will complete their studies two years earlier than degree students (who will take additional general and legal electives).
